CLUBS & PROJECTS

World of Addons   2018 - Present
Electron application

Open source addon manager for World of Warcraft. Install, update, and manage all your WoW addons in a single lightweight application.

NASA University Student Launch Initiative   Fall 2017 - Spring 2018
Rover Programmer

Designed and programmed the software of the OSU USLI competition rover while conducting educational outreach sessions with local schools and maintained the team website.

Smarter Balanced Sample Items   Summer 2017 - June 2018
Sample Items Website

Refactored, added features, and web accessibility for the Smarter Balanced websites used by 4700 educators and 600,000+ students across the United States to compare individual students' academic performance on a national level.

Oregon Department of Transportation   Spring 2016 - Summer 2017
TOCS Resource Management

Maintained, refactored, and updated the Transportation Operations Center System code base. This system coordinates emergency response teams to decrease response times for accidents and other disasters.

SB-components   Fall 2017

Created react modules for and maintained an NPM downloadable used for controlling and displaying information for the Smarter Balanced Websites.
